SCHOOL REGISTER

1941 - 1942

Teacher's Name

Miriam H. Montigel

Grade of Room

5B, 5A

For the School Year Beginning July 1, 1941
and Ending June 30, 1942THIS SCHOOL REGISTER IS NOT TO BE USED FOR ANY OTHER YEAR
THAN THAT FOR WHICH IT IS PREPARED

EXTRACTS FROM THE DEPARTMENT EDITION OF THE SCHOOL LAW

TEACHERS

18-12-115 Revised Statutes. Keeping school register. Each teacher in a public school shall keep a school register in the manner provided therein, and no salary shall be paid to him until the district clerk or other officer or person authorized to deliver the check, order, or warrant for such salary shall ascertain that the register has been properly kept for the time for which the salary is demanded and shall return upon the register a certificate to that effect.

18-12-116 Revised Statutes. Annual report to county or city superintendent. The check, order, or warrant for the balance of salary due a teacher at the time of closing the school for the current session, or of leaving the school before the end of the school year, shall not be delivered to him until the district clerk or other officer authorized to deliver the check, order, or warrant shall have received written notice from the county or city superintendent that the teacher has filed with him his annual report on the blank furnished for that purpose by the commissioner. In any school in which more than one teacher shall be employed the principal shall furnish the report.

18-12-117 Revised Statutes. Teaching school on holidays. No teacher shall be required to teach school on any day declared by law to be a public holiday, and no deduction from a teacher's salary shall be made by reason of the fact that a school day happens to be a day declared by law to be a public holiday. Any contract made in violation of this section shall have no force or effect as against a teacher.

18-12-118 Revised Statutes. Authority of teachers over pupils. A teacher shall hold every pupil accountable in school for disorderly conduct on the way to or from school, or on the playgrounds of the

school, or during recess, and may suspend any pupil from school for good cause, which suspension shall be reported forthwith by the teacher to the board of education. In any school in which more than one teacher is employed the principal alone may suspend a pupil.

PUPILS

18-12-120 Revised Statutes. Submission to authority; suspension or expulsion. Pupils in the public schools shall comply with the regulations established in pursuance of law for the government of such schools, possess the prescribed course of study, and submit to the authority of the teacher. Continued and wilful disobedience, open defiance of the authority of the teacher, or the habitual use of profanity or obscene language shall be good cause for suspension or expulsion of any pupil from school.

18-12-121 Revised Statutes. Injuring school property; suspension; parents' liability. Any pupil who shall cut, deface, or otherwise injure any schoolhouse, farmhouse, fences, outbuildings, or other property of the school district shall be liable to suspension and punishment, and his parents or guardian shall be liable for damages to the amount of the injury as he is collected by the board of education in any court having jurisdiction, together with the costs of the action.

18-12-122 Revised Statutes. Time of attending schools. Children who have never attended any public school or private school may be admitted to a public school during the ten days immediately following the opening of the school for the fall term, and at no other time except by a majority vote of all the members of the board of education of the school district in which the school is situated.

RULES AND REGULATIONS OF THE STATE BOARD OF EDUCATION

TEACHERS

18-22-8 Revised Statutes. CONTRACTS CONCERN WITH TEACHER WITHOUT CONTRACTING. Any contract or engagement between a board of education and a teacher shall cease and terminate and be of no effect against the board whenever the board shall ascertain by notice in writing received from the county or city superintendent or otherwise, that the teacher is not in possession of a proper teacher's certificate in full force and effect, notwithstanding the term or engagement for which the contract was made may not then have expired.

18-22-24 Revised Statutes. RIGHT OF TEACHER WITHOUT CREDIT. CASH TO SALARY. No teacher shall be entitled to any salary unless he is the holder of an appropriate teacher's certificate.

SCHOOL ATTENDANCE

126. For the purpose of appointment a day shall consist of not less than four clock hours of actual school work, except in kindergarten on continuous session of two and one-half clock hours may be considered a day. Night school sessions shall be not less than two clock hours in length and be reduced as half days.

127. The presence of a pupil merely at roll call shall not be considered a sufficient attendance to be a compliance with the intent of

the law. A pupil must be present at least one clock hour during any formation, discussion or evening studies in order to be recorded present. School registers shall be marked for every pupil for both sessions of each day in all elementary and high schools.

128. No attendance shall be marked in the register for the days during which a school is closed, but a report shall be made to the Commissioner of Education at the end of the year specifying in detail the days on which the school was closed and the reasons therefor. The attendance for days when the school shall have been absent for good cause will be computed by the Commissioner of Education. The teacher shall be required to write in the register on each day the school is closed the reasons why a session of the school was not held.

129. Whenever a child of school age is quarantined or is excluded from school by order of the board of education because of the supposed possession of contagious disease in his home, notice shall be sent to the Commissioner of Education, which notice shall state the date when such quarantine or exclusion was first effected, and the date when it was raised. This notice shall be accompanied by a certificate from the local board of education stating the reason for such quarantine or exclusion.

130. A full day's attendance shall be allowed when schools are closed part of the day on account of storm provided the session held is equivalent to a full day's.

INSTRUCTIONS TO TEACHERS

TEACHERS MUST KEEP THE REGISTER IN ACCORDANCE WITH THE FOLLOWING INSTRUCTIONS

1. REGISTER

The Register is to be used in the classroom every day for recording attendance.

A teacher must not copy her work into a new Register.

Keeping Registers by the calendar month does not interfere with the payment of salaries by the twenty-day school month.

Where there are more than 50 pupils enrolled in one classroom two Registers should be used. Mark them "No. 1" and "No. 2." Put monthly and yearly summary in "No. 2."

Teachers must place their name, grade of room, school number, name of school, district (township, borough or city) and county on the cover.

2. ENROLLMENT

Pupils are enrolled on pages 10 and 11 on the first day of attendance.

A pupil is enrolled in a given school district in but one Register during the year.

Recording ages at birthday nearest to September 1st on page 10 and 11, does not interfere in any way with the question of the names that kindergarten pupils under four years of age or primary pupils under five years of age cannot attend the public schools in this State.

If a pupil is promoted or transferred from one room, department or school to another in the same district, a transfer slip should be issued by the teacher of the former, to be presented to the teacher of the latter. This is to prevent a second enrollment. The blanks provided by the State (A41), or those containing the proper statistics provided by your board of education for transfer.

If a pupil moves from one school district to another during the school year, his name will appear in the school enrollment of each district. The word district means township, town, borough or city.

3. ATTENDANCE

Only the attendance of pupils who reside in the State, and who are of legal school age, is to be recorded in this Register. Legal ages: Kindergarten, between 4 and 7 years; day school, over 5 years; evening school, over 12 years.

Mark attendance in the columns under the date the school is in session.

Mark forenoon and afternoon attendance each in its respective column.

ATTENDANCE MUST BE RECORDED BY THE TEACHER AT EVERY SESSION OF SCHOOL, WHILE THE PUPIL IS ATTENDING.

No pupil shall be marked present who is not actually present.

No attendance shall be recorded in the Register when the school is not in session.

The mere presence of a pupil at roll call will not be considered as sufficient attendance to be a compliance with the law. A pupil must be present at least one hour during one forenoon, afternoon or evening session in order to be recorded as present one half-day. This applies to the occasional individual pupil and not to classes.

For the purpose of apportionment, a day shall consist of not less than four hours of actual school work, except that in kindergarten one continuous session of two and one-half hours may be considered a day. Evening school sessions shall be reckoned as half-days.

A half-day class, in receipt credit for one day's attendance must be in session for four hours, within a week.

A pupil is absent when not in attendance at a session of school while a member of the school. A pupil is either present or absent every day the school is in session after entering school until the date the pupil officially leaves the school for the school year.

Denote attendance by a sloping mark (/); absence by an acute angle (V); half-day sessions on account of storm by a cross (X) in the P. M. column; transferred, T (not to be used as an attendance mark); quarantined, Q (in connection with absence); left school, L (not to be used as an attendance mark). For date after a pupil leaves or is transferred, SR each space with a dash (—).

4. KINDERGARTEN AND HIGH SCHOOL DEPARTMENTS

In kindergarten classes having but one session, mark attendance in only one block and compute totals as if pupils had been present a full day. A kindergarten class is not one doing half primary work. (See school law.)

In high school classes holding one daily session of at least four hours exclusive of recess, mark attendance in the A. M. space and compute totals as if pupils had been present one session.

Kindergarten and high school Registers should have the words "Kindergarten" or "High School" plainly written on the cover opposite "Grade of Room."

5. EVENING SCHOOLS

Mark a half-day's attendance for each pupil of legal school age attending an evening session one or more times.

A pupil present 10 evenings would be credited with 10 day's attendance and be regarded as having had 10 days of possible attendance. If present 15 evenings he would be credited in the totals with an attendance of 15½ days and marked absent 2½ days.

Evening school Registers should have the words "Evening School" plainly written on the cover.

*An official leaving of school, as far as the Register record is concerned, shall be considered to mean: the change of HUSBANDY reference to another school (or attendance in another school during absence from the district when officially reported.

Pupils are either present or absent under all other conditions including illness, quarantine, suspension, or other prolonged absence, when not officially reported as excused elsewhere.

6. HALF-DAY CLASSES

Pupils in classes (except in the kindergarten and high school departments) having half-day sessions (less than four hours of actual school work) should be marked as present or absent, one half-day, and the reasons for leaving half-day sessions must be given in "Record of Reasons for Leaving School," page 5.

If a half-day class is in session 22 half-days a pupil present at 10 sessions (having been a member of the school during the 22 sessions) would be recorded as present 9 days, absent 2 days, number of possible days' attendance 11 days. No absence is to be marked for the class when it is not in session.

7. HALF-DAY SESSION ON ACCOUNT OF STORM

In schools in which the same pupils attend both a morning and an afternoon session, when, on account of storm, but not because of cold, pupils in attendance not less than three hours may be recorded as present one full day.

Mark attendance in the A, M. space and use the cross (X) in the P. M. space for every pupil present the required amount of time at the morning session.

8. SCHOOL CLOSED

Each teacher must report each day the school was closed for any reason, (1) in the column under the date, (2) the date and reason recorded on page 9. This includes holidays and vacation days.

9. ALLOWANCES

The law provides that "if a school in any district shall be closed on account of contagious disease, distribution of fire, school sessions by fire or otherwise, or for other good reason, an allowance for attendance lost shall be made and added to the total days attendance at the close of the school year."

No attendance is to be marked in the Register for the days during which the school is closed, but a report should be made to the Commissioner of Education, stating in detail the days on which the school was closed and the reasons therefor. The allowance of attendance for the days when the school was closed for any reason whatever will be calculated in this office, and all that the teacher is required to do is to note in the Register on each day the school was closed the reason therefor.

10. QUARANTINED PUPILS

The allowance for attendance lost by pupils quarantined will be approved by the Commissioner of Education and added to the total attendance of the district at the end of the school year.

Whenever children of any household of school age are excluded from school by order of the board of education because of the existence of a contagious disease in such household, notice shall be given to the Commissioner of Education of the date when such exclusion went into effect and the date when it was discontinued with a certificate from the board of education stating the reasons for such exclusion. Children residing in the building in which such contagious disease exists who are actually on roll in the school at the time the exclusion takes effect, excepting children who are ill, shall be credited as present during the time of such exclusion. The allowance for attendance lost by pupils excluded from school to whom said will be added to the total attendance of the district by the Commissioner of Education at the end of the school year. The Commissioner of Education shall prepare and distribute blank forms for carrying the rule into effect, and the notice provided for in this rule shall be forwarded on said forms (Form 657) as soon as possible after such exclusion is discontinued. Quarantined pupils are to be marked ABSENT in the Register.

Teachers will not record attendance for quarantined pupils, but may use a "Q" in connection with the absent mark as a matter of reference. Quarantined pupils are marked alone.

HEALTH, SAFETY, AND PHYSICAL EDUCATION

Notes: Teachers may remove these pages at the end of the school year. In doing so, please cut close to the printing in order to leave the staples undisturbed. Do not remove by tearing.

Purpose

The primary purpose of the State in establishing and furthering a health program in the public schools is to create conditions such that the pupil will derive an increased capacity for education, freedom from handicaps to growth and development, the habits and attitudes that constitute healthful living, a knowledge of the hygienic conduct of life and the ideals of health that make for rich and worthy living as an individual and as a member of society.

Good Health

Good health is that fitness of body, mind, and emotions which enables the individual to live to the full extent of his powers and to lead a normal, happy, and useful life.

Health is thought of as something more than mere physical fitness or the state of "looking well" or freedom from disease. It is regarded as including emotional stability and health of the entire nervous system, a wholesome outlook on life, the ability to adjust one's self to society and the environment, and the capacity to cope and enjoy life.

General Aims

1. To apply the principles of safe and healthful living to the educative process and school life.
2. To protect the physical and mental health of the pupil while at school.
3. To establish measures for determining the physical, mental, and emotional health status of pupils and for interpreting the findings in a manner advantageous to health.
4. To promote, with the cooperation of the home, measures for the removal or minimization of handicapping physical and mental defects or health conditions.
5. To establish in the school preventive measures that will lessen the incidence of communicable disease.
6. To provide for the training and instruction of the pupil in the attitudes and principles of safe and healthful living, with special emphasis upon the harmful effects of alcohol, tobacco, and narcotic drugs.
7. To establish and maintain school buildings and equipment that comply with the laws of hygiene and safety.
8. To provide a program in physical education that will insure normal physical development, that will give training and instruction in activities suitable for emotional purpose in leisure time; that will satisfy the natural play needs of the pupil; and that will serve as a medium for giving him practice the tenets of health, energy, and character education.

Aims of Health and Safety Education

1. To guide the pupil in the study, selection, and practice of personal health and safety activities, with a view to the formation of habits and skills.
2. To impart sufficient knowledge of the scientific principles underlying healthful practices to give meaning to the habits.
3. To aid in the development of attitudes that will cause the health and safety aim and the information concerning them to influence the behavior of the pupil in school and out.

4. To encourage the pupil to create ideals of health and safety service for self, family and community.

5. To instill in the pupil a sense of individual responsibility for the health and safety of others.

6. To assist the pupil in evolving standards of health and safety for the community.

Aims of Physical Education

1. To assist the natural processes of growth and development that normal strength, strength, endurance, and organic efficiency may be attained.
2. To assist the child in an erect and efficient carriage of the body, and to guide and encourage the pupil in the practice of correct posture.
3. To develop the fundamental motor skills that lead to graceful and effective movement.

4. To assist the pupil in acquiring the skills of physical activities, preferably those of the out-of-door, that provide stimulation and that can be continued in leisure time of the possessor and the future.

5. To offer preparation for society by providing situations for the learning of correct social responses and the training of the emotions.

6. To assist in the development of good character by providing actual situations in which the practice of desirable behavior traits becomes natural and satisfying.

General Division of Subject Matter

For Health and Safety Education

Grades I-III

Personal health and safety practices,
Health and safety content of the social studies,
Social behavior or manners,
Interpretation of the health practices of school life,
Health and safety practices involved in play,
Healthful foods and beverages in introduction to nutrition education.

Grades IV-VI

Personal health and safety practices and information,
Applications of hygiene and safety in the school and the home,
Introduction to drugs, poisons, and poisons of community health and safety,
Social behavior, manners, sportsmanship,
Narcotic education.

Grades VII-VIII

Personal health activities and interpretation of values,
Applied hygiene and safety in school, home, playground, and community situations,
Health and safety obligations of the citizen,
Government agencies for health and safety,
Significance of health and safety from their observation and education,
Elementary measures for prevention of communicable disease,
Care of simple emergencies,
Narcotic education.

Principles of Health and Safety Education

1. The teacher should exemplify in attitude and behavior the best health and safety practices.

2. Health and safety education should lead to the habitual practice of healthful and safe living rather than to the mere acquisition of information.

5. Health and safety habits should be strengthened by the development of attitudes favorable to continued practice.

6. Opportunities should be provided in which the pupil may experience satisfaction in the required practice of health and safety habits.

7. Experiences arising out of the pupil's daily life should be used as teaching situations.

8. The methods employed in health and safety education should produce wholesome mental reactions.

9. The predominant interests of the pupil should be one factor in the selection of method.

10. Health and safety education should grow out of the known needs of pupils.

11. Methods and vocabulary should be adapted to the comprehension of the pupil, and they should be meaningful.

12. The methods employed should be positive rather than negative in emphasis.

13. All available school facilities and resources should be used for providing the pupil with practical experience.

14. Only subject matter that is known to be scientifically accurate should be used.

15. Methods should be devised which discover and use the health and safety content of other subjects.

Arrangement of the Program

1. Successive periods of compensation include practice, muscle strain and final tongue, which are frequently causes of restlessness and discipline problems. They should be alternated with periods in which the work allows more freedom of movement.

2. Long continued use of the eyes in close work should be broken up by periods of far eye work or periods devoted to activities.

3. Work requiring favorable light should be scheduled in the middle of the day.

4. Frequent changes minimize the danger of loss of interest.

5. Subjects and activities contiguous in the program should present strong contrast, for example, art and hand work, reading and physical education, arithmetic and nature study.

6. The afternoon program should always provide a period for planned physical activity.

7. Short periods of rest or exercise for relaxation several times a day, have been demonstrated by experiment to have marked beneficial effects on mind and body.

8. Subjects chosen as exactly mental seem to bring better results in the morning.

9. The noon period should allow sufficient time for pupils to go home to lunch and return without undue haste.

General Indications of Illness

In the early stages, before an accurate diagnosis is possible, most of the so-called children's diseases show one or more of the signs or symptoms listed below.

Disinclination to enter into the daily activities, lassitude, droopiness, listlessness, fever, chills, muscular flak or pallor, dizziness, nausea, vomiting, sore throat, red watery eyes, nasal discharge, skin eruptions or rashes, profuse tears, frequent or spontaneous coughing, convulsions, urinary vesicles glands, headache or severe pain anywhere, tenderness.

Control of Communicable Disease

The classroom teacher is the key person in prevention and control measures. All of the school staff, for teacher is the only member absolutely essential to the program.

Detection—There should be a purposeful and effective health inspection in every classroom immediately upon the opening of the morning session or the afternoon session in the case of part-time schools.

Observation—The teacher should be on the alert continuously to detect deviation from normal color, expression or manner of any pupil in his class.

Inspection—Pupils exhibiting signs and symptoms previously indication of communicable disease should be excluded immediately from the classroom and if feasible from the school.

Note: "A teacher may exclude a pupil from the classroom and a principal may exclude a pupil from the building when there is evidence of some deviation from normal health and the school physician is not present or delayed."

Exclusion—Revised Bureau. Exclusion of pupils who are ill. When there is evidence of departure from normal health of any child, the principal of the school should upon the recommendation of the school physician or school nurse exclude such child from the school building, and in the absence from the building of the school physician or school nurse, the classroom teacher may exclude the child from the classroom and the principal may exclude the child from the school building.

Reporting—When pupils report or a communicable disease is present in the school district, the principal should transmit that information to the school physician or nurse. In rural districts the report should be made directly to the health officer.

Personal Hygiene—It is expected that pupils will be taught to cover coughs and sneezes, to avoid from putting objects in the mouth, to wash before eating and after going to the toilet, to remove wet clothing, and to refrain from excluding articles of food.

Exclusionary—By means of exclusion it is possible for pupils in completed cases and others in relation to illness and it is desired to discuss for discussion the proper procedure for these purposes and control.

Immunity—The prevention of measles and diphtheria by immunization should be vigorously and continuously promoted in the community by school officials.

Tracing—An acceptable method of tuberculosis case finding should be initiated routinely in all schools.

Personnel—To assure the maximum protection of pupils, it is important that high standards of health be established for teachers, custodians, and lunchroom workers, including at particular a liberal exclusion of such cases with pay.

Open Schools—Exposures distance the wisdom of keeping schools open, even in time of epidemics.

Attendance—Emphasis upon attendance, especially in cases of outbreaks and serious outbreaks mild health directly and indirectly benefits normally expected of a school health program.

Exclusion—Exclusion isolation from the class should be refused in a case of suspected disease when it is not possible or wise to send the pupil home.

Signs of Impaired Hearing

Inattention, lack of interest,
Inability to remember commands,
Exaggerated noise, impaired conversation,
Musical phrases, tending to lose,
Frequent requests to have questions repeated.

Signs of Defective Vision

Defects of vision, diseases of the eye, or improperly fitted glasses cause many signs or symptoms which should serve as warnings to the classroom teacher. For example:

Blindness,
Excessives,
Flicking, squinting, or watering of the eyes,
Tearing of the eyelids.

Squinting, frowning, wincing, or forehead or face, inclination of eyes or lids.

Frequent tears.

Swelling, puffiness, or drooping of lids.

Blurred or double vision, letters running into each other.

Sourness to light.

Fixed position of the head.

Tired feeling on winking the eyes.

Holding of books near or farther from the head than normal.

Misplacing words while reading.

Indifference to read heard work or tell time by an ordinary wrist-watch clock.

Unexplained differences in certain types of work, such as reading or writing, and without discernible signs or symptoms of eye defect.

Conservation of Vision

Place pupils with defective vision near the windows and in front seats.

Upright windows, draperies, excessive number of glass, and ornaments inside near light cause classroom eye effort to be less.

All windows should have a dust cloth.

Pupils should never be required to face windows or a bright light.

Avoid excess of sunlight or shadow on board or desk work.

For close eye work change the time of day when natural light is brightest.

Adapt light to enable pupils further from the window to read the printed page without squinting and to read ordinary writing on the front blackboard.

Soft chalk is better than hard. Yellow chalk is good. Large, bold characters can be read easily.

Keep blackboards black.

Avoid books, charts, and maps with fine print.

Light from the top part of the window, that is, light striking downward from the sky is best.

Narcotic Education

Significance—Considered in terms of individual and public health and human welfare, the importance of habit formation and instruction in refraction to protection against alcohol, tobacco, and narcotic drugs is obvious.

It is necessary to teach children the significance of good health habits and how such habits are maintained. The danger to health from the use of tobacco, alcohol, and narcotics should be succinctly explained. We must frankly discuss the temptations and dangers related to these things and advise our best materials at hand. It is important upon all who teach children so give them the best possible start in life.

The Best Defense—Other things being equal, due individual is best protected against temptations to use injurious substances—

who thinks clean and straight,

who plays the game fairly,

who is on the square with others,

who enjoys the clean thrill of sport,

who respects his body and knows why he does,

who is self-controlled and well colored,

whose body is strong and active,

whose health habits are correct and fixed,

whose interests in healthful living,

outnumber men and women.

Source of Information—Teachers should be familiar with the teaching aids and materials of the National Women's Christian Temperance Union, Evanston, Illinois.

Clinical Services of Official Agencies

Information concerning field service may be obtained through the following agencies:

State School for the Deaf, West Trenton. This is a residential school for deaf boys and girls between the ages of five and twenty. Classes on speech and hearing defects are held in various sections of the State.

A field worker is available for consultation concerning deaf children. Field work inquiries to Superintendent of the State School for the Deaf, West Trenton, New Jersey.

State Crippled Children's Commission, State House, Trenton. The Commission listens and registers crippled children, refers them to proper agencies for treatment and education, and assists in discovering vocational opportunities. Address inquiries to Chairman of Crippled Children's Commission, 732 Broad Street Back Room, Trenton, New Jersey.

State Commission for the Blind. The Commission makes surveys with special handicaps as well as the blind and partially blind. Children unable to do satisfactory schoolwork after the usual recommendation for correction have been carried out should be referred to the Commission. Address inquiries to Director, State Commission for the Blind, 3939 Broad Street, Newark, New Jersey.

State Board of Children's Guardians, 163 West Haverlee Street, Trenton. District offices are located as follows:

For Hudson County: 20 Tate Cottage, Jersey City

For Essex County: 544 of Newark, Newark

For Monmouth and Ocean Counties: 151 Front Street, Red Bank

For Bergen and Passaic Counties: Administration Building, Newark

For Atlantic, Camden, Cape May, Cumberland, Gloucester and Salem Counties: Court House, Camden

For Morris, Sussex and Warren Counties: 10 Park Plaza, Morristown

For Burlington, Essex, Gloucester, Mercer, Middlesex, Somerset and Union Counties: 651 West Haverlee Street, Trenton

Consult the field representative for your district in further problems arise with children who are under the supervision of the State Board of Children's Guardians.

State Department of Institutions and Agencies. The Department conducts mental hygiene clinics at many points in the State. Address inquiries to the Commissioner of Institutions and Agencies, State Office Building, Trenton, New Jersey.

New Jersey Tuberculosis League. The director of this Association will furnish information about tuberculosis clinics in the State. Address inquiries to Director of the New Jersey Tuberculosis League, 15 East Henry Street, Newark, New Jersey.

Selected Source of Health and Safety Information

Division of Health, Safety, and Physical Education, New Jersey State Department of Public Instruction, Trenton.

New Jersey State Department of Health, Trenton

11. OFFICIAL CARDS

The white card (Form A2) in the envelope in the back of the Register must be filled out in full, signed by the teacher and re-placed in the envelope.

Teachers must answer clearly all questions on the card and be sure to fill in the "Name of District," also "School and Number." "Actual number of days school was kept open" means the "actual number of days school was in session." It must not include holidays or any other day on which the school was closed.

"Number of days school was closed by order of the Board of Education, with date and reason," must include only those days when the school was closed for good cause, and for which an allowance is requested. (See Revised Statutes §§20-42.)

Superintendent, supervising principal, non-teaching principal, teachers of special subjects, and any other teacher who is not required to keep a Register, will fill out an official white card only so far as it pertains to himself, and deliver the same to the supervising officer, to be forwarded to this office.

At the close of the school year every principal or teacher in charge of a school containing one or more rooms will report on the above-mentioned cards (Forms A3B) the total attendance, absence and enrollment of pupils attending such school during the year.

In any district having a superintendent or supervising principal, the totals for said district will be reported by such superintendent or supervising principal on Form A3B, in addition to the principal's card. A teacher of a one room school will fill out the white and also the yellow card.

When a class is so large that two registers are used, one card should be made out containing the totals for the two Registers and the covers of the Registers should be marked "No. 1" and "No. 2."

This envelope contains 1 card.
Official White Summary Card.

NOTICE TO TEACHERS

The Official White Summary Card, containing the exact record of all pupils as entered in this register, must be filled out in full, replaced in this envelope, and accompanied register.

12. FORWARDING REGISTERS TO COMMISSIONER

This Register must be placed in the hands of the clerk of your school district on the day following the close of your school.

a. If it is a one room ungraded school, send it direct to the clerk of the Board of Education.

b. If a two or more room school, hand it to the principal, who will forward all the Registers of the School to the clerk in one package.

c. In a school district having a superintendent or supervising principal, the principals of two or more room schools and the teachers of one room ungraded schools will forward the Registers to the superintendent or supervising principal.

The clerk of the school district, on receiving all the Registers from the teachers in the district, will forward them in one package by express to Charles D. Anderson, Assistant Commissioner of Education, Department of Public Instruction, Trenton, N. J., not later than five days after the close of the schools. Use shipping letter A39 and shipping tag A40.
